# MAGO

# WEEE

## The WEEE module makes the Mago4 accounting software able to calculate the Waste of Electric and Electronic Equipment eco contribution automatically.

Are you subject to specific regulations and lose a lot of time in fulfilling their tasks? No panic, Mago4 can help you too!

One of these regulations is the disposal of electronic waste, which is the reason why the WEEE contribution is paid.
Thanks to Mago4 WEEE module, it is possible to define the total amount of the contribution for the various item categories, automatically deduct the eco-contribution in the sales invoices, generate WEEE entries, which are used in various reports, useful to always check the amount of contributions received.

Thanks to this module, you can define the total amount of the contribution for the various item categories, automatically charge the eco-contribution in the sales invoices, generate WEEE entries. You can also control the contribution calculated in a selected period.

### WEEE CATEGORIES

With Mago4, you can define WEEE categories, stating the total eco-contribution for each one of them.
It is really easy to use this module, when default data are uploaded, Mago4 already provides categories and relative amounts.
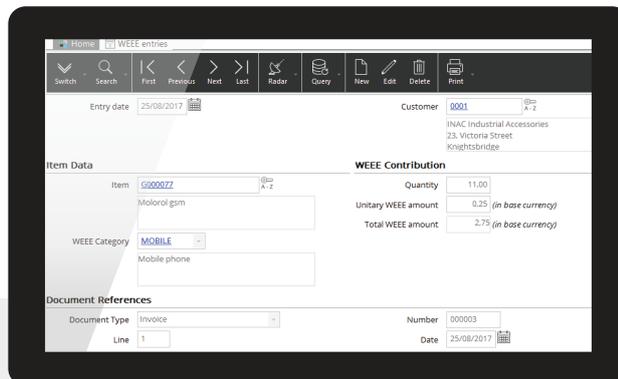

### SETTINGS FOR ITEM

You are fully free to set the items according to your needs: with Mago4 you can indicate the WEEE Eco-contribution directly on the single item, or refer to one or two WEEE category in the item. Moreover, it is possible to automatically associate the items with the WEEE categories: you can associate the same WEEE category as the commodity category or the WEEE category indicated to a set of selected items.

### WEEE CONTRIBUTION CALCULATION

Mago4 calculates the Contribution in the sales documents (immediate invoice, accompanying invoice, receipt, credit note). In particular, when saving a sales document, after inserting the items subject to the eco-contribution, Mago4 asks if you want to generate the WEEE entry.
In the WEEE entries you find information about the Eco-contributions. It is possible to edit the quantity and value calculated and also to directly add new entries.

**WEEE Entry**

Once the WEEE entry is confirmed Mago4 adds to the sales document the line relative to the calculation of the contribution, and saves all the WEEE entries to enable you to control the contribution calculated in a given period.

## PRINT

The WEEE contribution, automatically calculated by Mago4, can be added to the sales document or just registered in the WEEE entries.
If you decide to insert the WEEE contribution line to the sales documents, it is possible to set the item code to assign.

# 1

## REGULATION ONLY A CLICK AWAY

Easily Absolve the WEEE regulation.
Automatically deduct the eco-contribution in the sales invoices.
Keep under control all the generated WEEE entries.

# 2

## USEFUL SETTINGS

Define WEEE categories.
Use predefined data for an incomparable rapidity unmatched speed.
Use Contribution-Item Matches or vice versa.
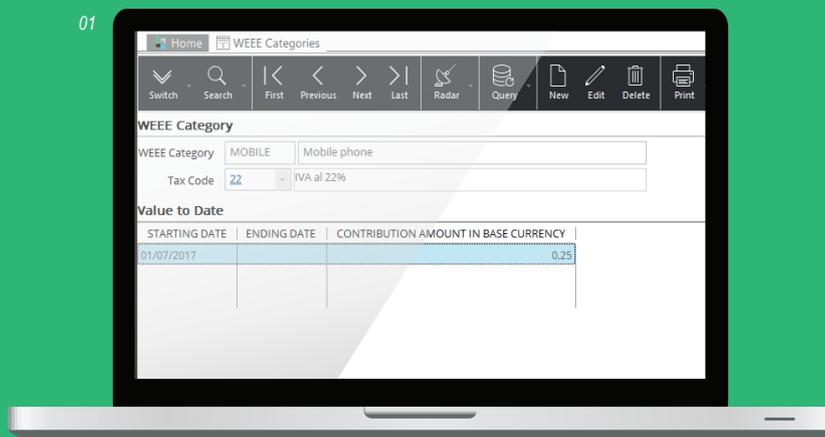

# 3

## WEEE CONTRIBUTION CALCULATION

Automate the calculation of the WEEE Contribution.
Generate WEEE entries and save them or add them to sales documents.
Check and modify, if necessary, calculated values.

# 4

## EASY PRINTING

You decide when printing the WEEE Contribution on an invoice.
Choose which item code to assign.
Record only the WEEE entry without printing it.
